Description

Jarid1C Polyclonal Antibody Cy3 Conjugated

Catalog No: #C07286Cy3

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

Isotype IgG Purification Purified by Protein A. Applications IF(IHC-P) Species Reactivity Hu Ms Rt Immunogen Description KLH conjugated synthetic peptide derived from human Jarid1C KDM5C Conjugates Cy3 Target Name Jarid1C	
Clonality Polyclonal Isotype IgG Purification Purified by Protein A. Applications IF(IHC-P) Species Reactivity Hu Ms Rt Immunogen Description KLH conjugated synthetic peptide derived from human Jarid1C KDM5C Conjugates Cy3 Target Name Jarid1C Other Names SmcX protein; Xe169 protein; DXS1272E; Histone demethylase JARID1C; JmjC domain of

Accession No. NCBI Gene ID:11184	
Concentration 1mg ml	
Formulation Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.	
Storage Store at 4C for 12 months.	

Application Details

IF:1:50-200

Background

Histone demethylase that specifically demethylates 'Lys-4' of histone H3, thereby playing a central role in histone code. Does not demethylate histone H3 'Lys-9', H3 'Lys-27', H3 'Lys-36', H3 'Lys-79' or H4 'Lys-20'. Demethylates trimethylated and dimethylated but not monomethylated H3 'Lys-4'. Participates in transcriptional repression of neuronal genes by recruiting histone deacetylases and REST at neuron-restrictive silencer elements. Tissue specificity: br>Involvement in disease: Defects in KDM5C are the cause of mental retardation syndromic X-linked JARID1C-related (MRXSJ). MRXSJ is characterized by significantly sub-average general intellectual functioning associated with impairments in adaptative behavior and manifested during the developmental period. MRXSJ patients manifest mental retardation associated with variable features such as slowly progressive spastic paraplegia, seizures, facial dysmorphism.
