

Von Willebrand Factor Conjugated Antibody

Catalog No: #C49301

Package Size: #C49301-Conjugated 50ul

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	Von Willebrand Factor Conjugated Antibody
Host Species	Rabbit
Clonality	Monoclonal
Clone No.	23A2
Applications	WB,IHC, IF
Species Reactivity	Hu
Immunogen Description	recombinant protein
Conjugates	Biotin AF350 AF405 AF488 AF555 AF594 AF647 AF680 AF750
Other Names	Coagulation factor VIII antibody Coagulation factor VIII VWF antibody F8VWF antibody Factor VIII related antigen antibody von Willebrand antigen 2 antibody von Willebrand antigen II antibody Von Willebrand disease antibody VWD antibody vWF antibody VWF_HUMAN antibody
Accession No.	Swiss-Prot#:P04275
Calculated MW	309 kDa
Formulation	Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Storage	Store at 4°C in dark for 6 months

Application Details

WB 1:500-1:2000 IHC 1:50-1:200

IF:1:50-1:200

Background

Von Willebrand disease is a congenital bleeding disorder caused by defects in the von Willebrand factor protein (VWF). VWF is a multimeric glycoprotein that is found in endothelial cells, plasma and platelets, and it is involved in the coagulation of blood at injury sites. VWF acts as a carrier protein for Factor VIII, a cofactor required for coagulation, and it promotes platelet adhesion and aggregation. Several factors are known to stimulate the binding of VWF to platelets, including glycoprotein 1b, ristocetin, botrocetin, collagen, sulphatides and heparin. Of the several domains contained within VWF, the A1, A2 and A3 domains have been shown to mediate this activation. VWF is thought to undergo a variety of posttranslational modifications that influence the affinity and availability for Factor VII, including cleavage of the propeptide and formation of N-terminal intersubunit disulfide bonds.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
