Product Datasheet

20S Proteasome α 3 (phospho Ser250) Polyclonal Antibody

Catalog No: #14120

Package Size: #14120-1 50ul #14120-2 100ul

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Description | |
|-----------------------|---|
| Product Name | 20S Proteasome α 3 (phospho Ser250) Polyclonal Antibody |
| Host Species | Rabbit |
| Purification | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific |
| | immunogen. |
| Applications | WB,IHC-p,IF(paraffin section),ELISA |
| Species Reactivity | Human,Mouse,Rat |
| Specificity | Phospho-20S Proteasome α 3 (S250) Polyclonal Antibody detects endogenous levels of 20S Proteasome α 3 |
| | protein only when phosphorylated at S250. |
| Immunogen Description | The antiserum was produced against synthesized peptide derived from human Proteasome alpha3 around the |
| | phosphorylation site of Ser250. AA range:206-255 |
| Other Names | PSMA3; HC8; PSC8; Proteasome subunit alpha type-3; Macropain subunit C8; Multicatalytic endopeptidase |
| | complex subunit C8; Proteasome component C8 |
| Accession No. | Swiss Prot:P25788GeneID:5684 |
| SDS-PAGE MW | 32 |
| Concentration | 1 mg/ml |
| Formulation | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. |
| Storage | -20°C/1 |
| | |

Application Details

Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. ELISA: 1/10000. Not yet tested in other applications.

proteasome subunit alpha 3(PSMA3) Homo sapiens The proteasome is a multicatalytic proteinase complex with a highly ordered ring-shaped 20S core structure. The core structure is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes a member of the peptidase T1A family, that is a 20S core alpha subunit. Two alternative transcripts encoding different isoforms have been identified. [provided by RefSeq, Jul 2008],
