## Description

| Product Name          | LRRK2 Conjugated Antibody   |
|-----------------------|---|
| Host Species          | Rabbit  |
| Clonality             | Monoclonal  |
| Isotype               | Rabbit IgG  |
| Purification          | Affinity-chromatography   |
| Applications          | WB, IF  |
| Species Reactivity    | Human Mouse   |
| Specificity           | LRRK2 Antibody detects endogenous levels of total LRRK2                                     |
| Immunogen Description | A synthesized peptide derived from human LRRK2  |
| Conjugates            | Biotin AF350 AF405 AF488 AF555 AF594 AF647 AF680 AF750                                      |
| Other Names           | Leucine-rich repeat serine/threonine-protein kinase 2; Dardarin; PARK8; ROCO2; RIPK7; LRRK2 |
| Accession No.         | Uniprot:Q5S007  |
| Calculated MW         | 286kDa  |
| Storage               | Store at 4°C in dark for 6 months   |

## Application Details

WB: 1:50-1:200

IF:1:50-1:200

## **Product Description**

LRRK2 positively regulates autophagy through a calcium-dependent activation of the CaMKK/AMPK signaling pathway. The process involves activation of nicotinic acid adenine dinucleotide phosphate (NAADP) receptors, increase in lysosomal pH, and calcium release from lysosomes. Together with RAB29, plays a role in the retrograde trafficking pathway for recycling proteins, such as mannose 6 phosphate receptor (M6PR), between lysosomes and the Golgi apparatus in a retromer-dependent manner.

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
