Product Description

Clusterin (CLU, apolipoprotein J) is a multifunctional glycoprotein that is expressed ubiquitously in most tissues. Clusterin functions as a secreted chaperone protein that interacts with and stabilizes stress-induced proteins to prevent their precipitation. Research studies show that clusterin plays a protective role in Alzheimero $\Omega\frac{1}{2}$ o $\Omega\frac{1}{2}$ s disease by sequestering amyloid $\beta(1-40)$ peptides to form long-lived, stable complexes, which prevents amyloid fibril formation.
