Product Name	EPS15 (Phospho-Tyr849) Antibody
Host Species	Rabbit
Clonality	Polyclonal
Purification	Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates.
	Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho
	specific antibodies were removed by chromatogramphy using non-phosphopeptide.
Applications	WB
Species Reactivity	Hu Ms Rt
Specificity	The antibody detects endogenous levels of EPS15 only when phosphorylated at tyrosine 849.
Immunogen Type	Peptide-KLH
Immunogen Description	Peptide sequence around phosphorylation site of tyrosine 849 (S-A-Y(p)-P-S) derived from Human Ephrin
	EPS15.

Swiss-Prot#: P42566; NCBI Gene#: 2060; NCBI Protein#: NP_001972.1.

Application Details

Western blotting: 1:500~1:1000

Images

Western blot analysis of extracts from JK cells (Lane 2), using EPS15 (Phospho-Tyr849) Antibody #11800. The lane on the left is treated with antigen-specific peptide.

Rabbit IgG in phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150mM NaCl, 0.02% sodium azide

Background

This gene encodes a protein that is part of the EGFR pathway. The protein is present at clatherin-coated pits and is involved in receptor-mediated endocytosis of EGF. Notably, this gene is rearranged with the HRX/ALL/MLL gene in acute myelogeneous leukemias. Alternate transcriptional splice variants of this gene have been observed but have not been thoroughly characterized.
