## Integrin Alpha V + Beta 3 Antibody Cy3 Conjugated

Catalog No: #C02329Cy3

Orders: order@signalwayantibody.com Support: tech@signalwayantibody.com

| Description           | Support: tech@signalwayantibody.com  |
|-----------------------|--|
| Product Name          | Integrin Alpha V + Beta 3 Antibody Cy3 Conjugated  |
| Host Species          | Rabbit   |
| Clonality             | Polyclonal   |
| Isotype               | IgG  |
| Purification          | Purified by Protein A.   |
| Applications          | IF   |
| Species Reactivity    | Hu Ms Rt   |
| Immunogen Description | KLH conjugated synthetic peptide derived from human Integrin Alpha V + Beta 3                    |
| Conjugates            | Cy3  |
| Target Name           | Integrin Alpha V + Beta 3  |
| Other Names           | CD51; MSK8; VNRA; VTNR; Integrin alpha-V; Vitronectin receptor subunit alpha; ITGAV; CD61; GP3A; |
|                       | BDPLT2; GPIIIa; BDPLT16; Integrin beta-3; Platelet membrane glycoprotein IIIa; ITGB3             |
| Accession No.         | Swiss-Prot#:P05106, P06756NCBI Gene ID:3690, 3685  |
| Cell Localization     | Extracellular  |
| Concentration         | 1mg ml   |
| Formulation           | 0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.                                 |
| Storage               | Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.                  |

## **Application Details**

IF=1:50-200

## Background

ITAGV encodes integrin alpha chain V. Integrins are heterodimeric integral membrane proteins composed of an alpha chain and a beta chain. The I-domain containing integrin alpha V undergoes post-translational cleavage to yield disulfide-linked heavy and light chains, that combine with multiple integrin beta chains to form different integrins. Among the known associating beta chains (beta chains 1,3,5,6, and 8; 'ITGB1', 'ITGB3', 'ITGB5', 'ITGB6', and 'ITGB8'), each can interact with extracellular matrix ligands; the alpha V beta 3 integrin, perhaps the most studied of these, is referred to as the Vitronectin receptor (VNR). In addition to adhesion, many integrins are known to facilitate signal transduction. The ITGB3 protein product is the integrin beta chain beta 3. Integrins are integral cell-surface proteins composed of an alpha chain and a beta chain. A given chain may combine with multiple partners resulting in different integrins. Integrin beta 3 is found along with the alpha IIb chain in platelets. Integrins are known to participate in cell adhesion as well as cell-surface mediated signalling.
