

JIP2 Polyclonal Antibody Cy5 Conjugated

Catalog No: #C02748Cy5

Orders: order@signalwayantibody.comSupport: tech@signalwayantibody.com

Description

Product Name	JIP2 Polyclonal Antibody Cy5 Conjugated
Host Species	Rabbit
Clonality	Polyclonal
Isotype	IgG
Purification	Purified by Protein A.
Applications	IF(IHC-P)
Species Reactivity	Hu Ms Rt
Immunogen Description	KLH conjugated synthetic peptide derived from human JIP2
Conjugates	Cy5
Target Name	JIP2
Other Names	MAPK8IP2; C jun amino terminal kinase interacting protein 2; C-jun-amino-terminal kinase-interacting protein 2; Homologous to mouse JIP 1; IB 2; IB-2; IB2; Islet brain 2; Islet-brain-2; JIP 2; JIP-2; JIP2; JIP2_HUMAN; JNK interacting protein 2; JNK MAP kinase scaffold protein 2; JNK MAP kinase scaff
Concentration	1mg ml
Formulation	Aqueous buffered solution containing 1% BSA, 50% glycerol and 0.09% sodium azide.
Storage	Store at 4C for 12 months.

Application Details

IF:1:50-200

Background

c-Jun NH2-terminal kinases (JNKs) are distant members of the MAP kinase family (1). JNK1 is activated by dual phosphorylation at a Thr-Pro-Tyr motif in response to ultraviolet (UV) light, and it functions to phosphorylate c-Jun at amino terminal serine regulatory sites, Ser-63 and Ser-73, resulting in transcriptional activation (2-5). Two additional JNK family members have been identified as JNK2 and JNK3 (3). JIP-1 (for JNK interacting protein-1) has been identified as a cytoplasmic inhibitor of JNK that retains JNK in the cytoplasm, thereby inhibiting JNK-regulated gene expression. Evidence suggests that JNK1 and JNK2 bind to JIP-1 with greater affinity than to ATF-2 and c-Jun, which are targets of the JNK signaling pathway. JIP-1 contains an amino terminal JNK binding domain and a carboxy terminal SH3 domain. ATF-2 and c-Jun also contain the JNK binding domain and are thought to compete with JIP-1 for JNK binding (6). Multiple splice variants of JIP-1, including JIP-1b, JIP-1c (also designated islet-brain 1 or IB-1), JIP-2a, JIP-2b and JIP-3, have been identified in brain (7).

Note: This product is for in vitro research use only and is not intended for use in humans or animals.
